## Zenonia 5 max level

I am a video game fanatic with over six years of experience as an online writer. Wizard of Zenonia 5 has probably the best normal attack in the game. It's fast, and with the new 8 directions you can attack (rather than the previous 4), you can aim your attack diagonally and juggle enemies that would kill you otherwise. It's a really fun class to play but has the obvious downside of not having lots of HP. Zenonia 5 skills also have invincibility frameworks now, so that's a big plus for this class. Basically you will die if you suffer only a few times (managers do OHKO though) but can get out of most situations alive. Stat Points: STR: DEF +2 INT: SP +20, ATT +6, HIT +0.14, CRTDMG +0.18 (CRI + 0.01 with CRI for INT) DEX: To +1, Hit +0.06, CRI +0.34, EVA +0.24 CON: HP +22, Def +2 (keep this stuff in mind in choosing your gear as well) Based on the stats you get, STR is obviously a no-go. You can try full INT, for the most attack you can get, but obviously you will miss the tone and tone of HP. 0.34 CRI per DEX isn't too shabby either. I'd suggest something like pumping everything in INT, and when you start getting hit too hard up CON. Then if I'm happy with my injury, maybe add a little bit to the DEX. Something like 5 INT 1 CON per level. The [Damage] and [Approximate Skill Level 10 Damage] are there to help perhaps compare skills better. You can replace your ATT in formulas and get an average damage to a single monster. If an attack is 'x aoe', it means you can hit anything nearby. Skills So basically you will want to choose 2 to 6 main attacks to fill your skill slots. If you don't want to keep track of 6 attacks, you can only max out two and rarely (or never) have to switch to the second set of skill spots. The wizard has a bunch of meh abilities in the lower levels; if you are a perfectionist you probably want to skip most of them and rely solely on your normal attack. I'd add Mana Drain for a good DPS attack, one of the later AOE attacks to round up my two main attacks, and have Psychic Shield and concentration to the top of it. You can go about your stuff in many ways. Teleport [Level 1] – Doesn't seem very useful, you do some damage and teleport forward. Psychic ball [Level 1] – Not good; you send out 3 projectiles. [Injury] (ATT 150% + 10 per skill level) x 1-2 hits x 3 balls [Ca Lvl 10 Damage] ATT x (240% ~480%) x 3 Projectiles Tornado [Level 5] - Half-decent attack aiming straight ahead in a pretty thin line, only hits twice. If you can't survive to level 25 for Mana Drain on just your normal attack then take this. [Injury] (ATT 250% + 15 per skill level) x 2 hits [Ca Lvl 10 Damage] ATT x (770%) Force Wall [Level 5] – Not good, though you can use it for managers if have any problems by luring the boss into it and running around it so it keeps getting damaged. of Wisdom [Level 5] - Worse Than Psychic Shield [25] Magic Arrow [Level 15] - Not As Good As Concentrate [35] [35] increase your normal attack (but you could use them together if you wanted) Chain Lightning [Level 15] - Not as good as Mana Drain [25] [Damage] (ATT 280% + 20 per skill level) x 1 hit + DOT [Ca Lvl 10 Injuries] ATT x (770%) Mana Drain [Level 25] – Probably your

best attack; it's like chain flash with better range that hits up to 10 times. There is a technical error (or it may be intentional) that you interrupt the attack early by pressing a direction. [Injury] (ATT 80% + 5 per skill level) x 10 hits + DOT x 3 monsters. [Ca Lvl 10 Injury] ATT x (1250%) + DOT x 3 monster Psychic Shield [Level 25] - Take damage to your SP rather than your HP for a bit. This will save your life if you don't have crazy HP gear or a lot of CON. Wizards always need a skill like this, c'mon now. Even if you add 10 skill points, it still lasts only 30 seconds. Mental Break [Level 25] – Hits the entire screen once. Can be useful for drawing aggro because it has the longest range of all your attacks. [Injury] (ATT 550% + 50 per skill level) x 1 hit x aoe[Ca Lvl 10 Injuries] ATT x (1000%) x aoe Psychic Spin [Level 35] – Good AOE attack that goes in all 8 directions outwards from your character while knocking it all back. However, a couple of hits around 2 to 4. [Injury] (ATT 200% + 12 per skill level) x 2-4 hits x aoe[Ca Lvl 10 Damage] ATT x (616%–1232%) Concentration [Level 35] – Since most of the guide's attacks are AOE's and there isn't a really good 1v1 skill. This upgrades your normal attack as that good 1v1 skill. Starfall [Level 35] - Good AOE attack, the range is quite small anyway. Monsters get hit around 4-8 times. It can be used an escape attack if you are surrounded because monsters are staggered and slower. [Injury] (ATT 120% + 10 per skill level) x 4-6 hits x aoe[Ca Lvl 10 Damage] ATT x (840%–1260%) Psychic Storm [Level 45] – Another AOE, tons and lots of hits and follows monsters around damaging them but the original range is pretty bad. Cooldown is super long too, so if you don't love this attack, you probably won't want to level up that much over the other AOE's. [Injury] (ATT 65% + 4 per skill level) x around 10 hits + Shock Damage DOT x 4 monsters[Ca Lvl 10 Damage] ATT x (~1010%) + DOT x 4 monsters For Passives, add what you are missing. Attack is always useful, and since the wizard does not have enough HP, def / Con is necessary too. The first two [level 5] passives are not good unless you find yourself being very bad all the time. The last two are pretty good to put leftover points in. BuildsLvl 2 – Psychic Ball (1)Lvl 3 to 4 – Save PointsLvl 5 – Tornado (1), ATT Increase (1), Force Wall (1)Lvl 6 to 14 – ATT Increase (10)Lvl 15 – Chain Lightning (1)Lvl 16 to 24 – DEF Increase (9)Lvl 25 – Mana Drain (1)Lvl 26 – Psychic Shield (1)Lvl 27 – Mental Break (1)Lvl 28 to 34 – INT Increase (7)Lvl 35 – Psychic SpinLvl 36 – ConcentrateLvl – StarfallThen you can only max out your favorite skills. There are 108 skill points (Max (Max is 109 now) so my skills would bePsychic Ball (1)Tornado (1)Force Wall (1)Chain Lightning (1)Mana Drain (10)Mental Break (1)Psychic Shield (1)Psychic Spin (10)Concentrate (10)Starfall (1)10Psychic Storm (1)TO Increase (10)DEF Increase (10)CON Increase (10)INT Increase (10)Passive Master (10)Devil's Recovery (1)Area Zero (10)If you are a perfectionist and don't want to waste any points , then skip the first skills and you will end up with something like this. Chain Lightning (1)Mana Drain (10)Mental Break (1)Psychic Shield (7)Concentrate (10)Starfall or Psychic Spin (10)Psychic Storm (1)ATT Increase (1)ATT Increase (110)DEF Increase (10)CON Increase (10)INT Increase (10)Passive Master (10)CRI per INT (10)Devil's Recovery (1)Area Zero (5)Something Similar. Misc.Something you can do with your normal attack combo-it goes 3 small blasts then 1 big right? You can make the 3 small attacks, use a skill, then hit the attack after the skill is over and the big 1 will still work. You know what I'm talking about lol, it might be useful. HP Medicine is better than HP Potion (L) at around 2666 HP SP Medicine is better than SP Potion (L) at around 3333 SP Skill Reset costs 150 ZEN which is pretty awesome. You can walk into Abyss once a day for free, and the wizard's constant AOE works great for it. © 2013 Ttocs LCommentsMagestart on May 17, 2017:Hi im playing zenonia 5 right now and apparently i can't find the int increase of the passive so what can i replace it with??? Tipper, November 4, 2016:Hello! I would like to share a Zenonia 5 tipSamuel Franklin on September 9, 2015:Haven't played past Zenonia 4 personally but I think it's one of the better experiences (and if I played it it must be like a belly). It may be time to get back into the series, thanks for the Skill Guide!May 01, 2014:I think your zenonia 4 guide is way more better than this tutorial, you can not do the guide as beforeirman1111 on February 14, 2014:wonderful .... add medaniel d on January 27, 2013:how do you enchant weapons and make them also what are slots for and the stone things I need for them. it is a guide on enchanting and making weapons In Zenonia 5, you should choose from four different classes, such as a Berserker. You can of course set up other special skills by going to your skill menu then adding them to fast on. The rest of my points go into passive abilities. You don't necessarily have to place any points in con because your psychic shield will nullify all dmg and since I went full INT I'm not on mana. You do not earn any additional gold or bills of exchange. So if you are tired of time-based systems, this is definitely a game for you. There is generally a super move for each sign of the third strike unless you get interrupted by the enemy. The fight against another mechanic is a race to see who handles the more damage first, it's a race between your HIT and EVA ability. [starringmulti id=2 style='plain' size='16' average\_stars='plain' average\_stars='plain' all Zenonia series, gameplay is very easy to get immersed in. Although it doesn't show on the stats screen, but your fairy gets stronger as they equip and update their runes at higher levels. At game levels, the damage classes have better time to grind for gears and con builds are stronger in PvP. I tried many times fighting hades. There are also a lot of useless spells and skills so we won't care about these skills. Fire can handle further burning damage. Normal, you should have max 10 psychic ball with 8x crit rate (max int) & psychic spin. The Paladin. i am now a wiz level 77. i defeated hades in 3 minutes w/o using the origin of life. Stay away from him when in Mega mode because you'll get sudden death. I've been shocked with the amount of details Zenonia supplies with each new game. Updated April 14, 2016. It's pretty low harmful (only 5 ATT for STR) but you get lots of DEF so the class is pretty easy to play. but I think hades is not that difficult. \*Note\* At the quick of the menus, you need to swipe the circles to switch. No matter what class you get to choose the story is the same but of course the gameplay is different. The graphics are simply stunning in Zenonia 5. Very difficult!i'm lvl90 berserk. You will find that it's hard to argue that it's probably the best graphics we've seen in any Zenonia title yet. There is everything needed to be in a good jRPG here. burn half the health of a paladin with 2 k def (mine that is 3k7) with only 2 skill!You should try psychic spin, it is awesome!!!. Im stuck in level 36..Monsters that are level 33 can defeat me with ease.. Hi! The Zenonia 5 raid mode is completely useless in increasing your characters. This is because the mechanics of the game are just really easy to get and you don't have to be a rocket scientist to figure out how to do something. The battle system is not time-based like other JRPG like Final Fantasy. In this Zenonia 5 skill discussion mechanic, we will go over the various active skills to help you determine the best skills to get. Based on our recommendations in the various active skills, we have come up with the following skill builds for your mechanic. Also you have to invest some stat points in con, cause u'll die in PvP very fast.yes you true dude because first I think the damage is not enough to kill but its give twice damage to monsters around youBoth is great, but starfall is better. If you want to accomplish something, you need to be ready for hours and hours at the end of grinding levels. I beat that until he got a quarter more life and then he hit me with 1 tornado,just didn't stop yet. Bersecker and Paladin both have mirror damage, and you will die very soon. The color of the object will help determine this. We love Zenonia, in fact, the Zenonia series was actually the very first series we have made guides and players loved it. Zenonia 4 was released around the same time as it is right now in December and it provided a whole new experience for Zenonia players. Players. av maxing ut en färdighet jag har 4-5 som tillåter mig att alltid ha en tillgänglig medan andra svalnat.
